Goat Skin Leather Palm Impact & Cut-Resistant Gloves Protection & Cool Mesh™ Venting

FEATURES:

- **Premium Goatskin Leather Palm** – Offers superior dexterity, comfort, and high abrasion resistance for heavy-duty performance.
- **Cool Mesh™ Venting System** – Enhances airflow by up to 60%, keeping hands cooler than conventional impact gloves.
- **Kevlar® Lined with Advanced Engineered Yarn** – Delivers enhanced cut resistance while maintaining flexibility and control.
- **Ergonomic Wide TPR Back Protection** – Shields the back of hand and knuckles from high-impact hazards without compromising mobility.
- **Reinforced Thumb Saddle** – Strengthens critical stress points for extended glove life.
- **Cushioned Palm Layer** – Reduces vibration and pressure buildup for greater comfort during long shifts.
- **Slip-On Cuff with Hook & Loop Closure** – Ensures a secure, adjustable fit and easy on-off transition

INDUSTRIES:

- **Oil & Gas Industry** – Built for rig workers, technicians, and service crews handling mechanical operations.
- **Construction & Engineering** – Ideal for skilled laborers operating in high-impact environments.
- **Automotive & Transportation** – Supports assembly lines, garage teams, and field technicians.
- **Manufacturing & Industrial Production** – Delivers durable, flexible protection for multi-phase processes.
- **Glass & Metal Fabrication** – Ensures cut safety and handling ease across fragile or sharp materials.
- **Utilities & Technical Maintenance** – Designed for repair work, infrastructure upgrades, and site servicing.

APPLICATIONS:

- **Appliance & Equipment Manufacturing** – Protects against sharp edges, impact, and repetitive handling stress.
- **Oilfield & Energy Operations** – Shields hands in abrasive, high-risk environments with fluid exposure.
- **Automotive Assembly & Repairs** – Enhances grip, dexterity, and safety when working with tools and machinery.
- **Construction & Infrastructure Tasks** – Offers cut and impact protection during heavy-duty site work.
- **Glass & Sheet Metal Handling** – Provides precise control and resistance to sharp surfaces.
- **Machining, Stamping & Paper Production** – Supports high-speed handling of components, materials, and tools.

Safety for every industry.
