OIL & GAS, A6 CUT RESISTANT GLOVE WITH IMPACT PROTECTION

FEATURES:

- **Durable Outer Shell:** Constructed with DryTuff® oil and water-resistant full-grain goatskin leather, ensuring excellent flexibility, durability, and long-lasting protection even in oily or wet conditions.
- **High-Cut Resistance Liner:** Reinforced interior made from a blend of para-aramid, steel, and polyester fibers, offering exceptional cut and abrasion resistance.
- **Thermal Insulation:** Features 3M™ Thinsulate™ C100 lining combined with an extra layer of soft fleece for superior warmth in cold working environments.
- **Impact 2 Protection:** Equipped with heavy-duty, flame-resistant TPR (thermoplastic rubber) on the back of hand, fingers, and wrist to absorb shocks and protect against impact injuries.
- **Flame-Resistant Stitching:** Entire glove is stitched with Kevlar® thread, adding superior strength and resistance to heat and flame.
- **Secure Fit:** Snug shirred elastic wrist ensures a comfortable, secure fit and helps keep out debris and cold air.
- **Gauntlet Cuff Style:** Designed with an extended gauntlet cuff for additional forearm protection and easy on/off during use.

INDUSTRIES:

- **Oil & Gas Industry:** Ideal for rig hands, maintenance crews, and pipeline workers operating in cold, hazardous environments.
- **Mining & Drilling:** Suitable for handling heavy machinery and tools where impact and abrasion protection are essential.
- **Utilities & Energy:** Great for linemen, electrical technicians, and maintenance crews exposed to cold and mechanical risks.
- **Construction & Demolition:** Offers all-around protection for workers dealing with metal, sharp tools, or cold outdoor conditions.
- **Fire & Rescue Support:** Used for cold-weather rescue or utility work where both thermal insulation and dexterity are needed.
- **Metal Fabrication:** Excellent for handling sharp metal parts and tools where cut resistance and durability are vital.

APPLICATIONS:

This glove is designed for high-risk, heavy-duty applications where protection from cold, impact, cuts, abrasion, oil, and flame exposure is required.
