Cut-Resistant Gloves - Durable Goatskin with Kevlar® Protection

FEATURES:

- High-tensile goatskin ensures exceptional abrasion resistance and long-lasting durability.
- Reinforced palm provides enhanced grip and extra protection in demanding conditions.
- Lined with Kevlar® and composite filament fiber for superior cut resistance.
- Cut-Level A6 protection ensures maximum safety against sharp objects.
- TPR backhand impact protection meets level 2 safety standards for heavy-duty tasks.
- Sewn with Kevlar® thread to increase strength and enhance glove longevity.
- Available in multiple cut levels (A2–A9) and winter versions for cold-weather work.

INDUSTRIES:

- **Oil and Gas** – Ensuring flame and mechanical hazard protection for professionals.
- **Manufacturing** – Tailored for workers dealing with machinery and sharp materials.
- **Appliance Manufacturing** – Supports tasks requiring enhanced grip and abrasion resistance.
- **Steel Plants** – Providing high-level protection for metal fabrication and processing.
- **Construction** – Essential for durability and safety in high-impact job sites.
- **Agricultural Equipment Handling** – Designed for farm and heavy equipment operators.

APPLICATIONS:

- **Oil and Gas Industry** – Protecting workers from cut and impact hazards in high-risk environments.
- **Manufacturing** – Ideal for handling sharp materials and operating heavy machinery.
- **Appliance Manufacturing** – Ensures precision handling and safety in assembly tasks.
- **Steel Plants** – Provides superior abrasion and cut resistance for metalworking operations.
- **Construction** – Enhances grip and durability for demanding work environments.
- **Forklift Operation** – Offers impact resistance and secure handling for logistics tasks.
