

GRAYWOLF®
GW7400ACSC5-MST

AVAILABLE SIZES

Aluminized Molten Metal & Heat-Resistant Safety Shoe Cover with Kevlar® Reinforcement

FEATURES:

- **Aluminized Outer Shell** – Reflects radiant heat and shields against molten metal splashes up to 3000°F.
- **Kevlar® Aramid Lamination** – Provides high-level cut, flame, and thermal resistance.
- **Forefoot Metal Strip** – Allows individual adjustment for enhanced stability and comfort.
- **Straight Calf/Bootleg Design** – Ensures secure coverage with darts for a tailored fit.
- **100% Kevlar® Thread Stitching** – Reinforced seams for durability under flame and abrasion stress.
- **Lightweight & Comfortable** – Designed for extended wear without restricting movement.
- **Patented GRAYWOLF® Engineering** – Customizable to meet specific industrial requirements.

INDUSTRIES:

- **Steel & Metal Processing** – Built for high-temperature production environments.
- **Smelting & Refining** – Reliable protection in molten metal zones.
- **Glass Production** – Protects against radiant heat and thermal hazards.
- **Welding & Fabrication** – Trusted by professionals for flame and heat resistance.
- **Thermal Insulation & Radiant Barriers** – Used in high-heat shielding applications.
- **Cement & Ceramic Industries** – Suitable for kiln operations and heat-intensive tasks.

APPLICATIONS:

- **Steel Mills & Foundries** – Protection during casting, forging, and molten metal handling.
- **Smelters & Furnaces** – Shields footwear from radiant and conductive heat.
- **Glass Manufacturing** – Ideal for hot glass forming and finishing zones.
- **Metal Fabrication & Welding** – Flame-resistant coverage for sparks and molten splash.
- **Industrial & Commercial Ovens** – Supports technicians working near high-heat systems.
- **Radiant Barrier Operations** – Effective in insulation and shielding applications.
