

## Goatskin Palm, Kevlar® Stitching, Fleece Lined for Heat Protection

## **FEATURES:**

- Goatskin Leather Palm Provides excellent flexibility and tactile sensitivity for TIG/MIG welding.
- Cowhide Split Leather Back Enhances durability and abrasion resistance in high-heat environments.
- Straight Thumb Design with Reinforcement Improves grip and extends glove life in stress zones.
- Fleece Lining Adds comfort and insulation against radiant and conductive heat.
- Kevlar® Thread Stitching Strengthens seams for flame resistance and long-term durability.
- Ergonomic Fit Supports natural hand movement and reduces fatigue during precision tasks.
- Heavy-Duty Industrial Build Engineered for consistent performance in demanding conditions.

## INDUSTRIES:

- Metal Fabrication & Welding Trusted by professionals for heat and flame resistance.
- Steel & Foundry Operations Built for molten metal and high-temperature environments.
- Shipbuilding & Marine Engineering Durable for structural welding and repair.
- **Automotive & Machinery –** Supports safe handling of hot components and tools.
- Manufacturing & Assembly Reliable for industrial production and maintenance.
- Energy & Utilities Suitable for welding and repair in power generation and infrastructure.

## **APPLICATIONS:**

- TIG & MIG Welding Ideal for precision and high-heat welding operations.
- Steel Mills Protects hands during casting, forging, and metal handling.
- Shipyards Durable for structural welding and marine fabrication.
- Manufacturing Plants Suitable for assembly, maintenance, and fabrication zones.
- Automotive Industry Reliable for welding, grinding, and metal shaping.
- Gas Welding & Torch Work Shields hands from sparks, heat, and sharp materials.
